PACCOR

THE FUTURE OF FOOD SERVICE SOLUTIONS

OUR BRAND COMMITMENT

TABLE OF CONTENTS:

MARKETS WE SERVE

Our diverse solutions meet current market trends, where consumers seek convenient, sustainable and affordable products in a wide variety of formats.

THE NEW PLASTICS ECONOMY GLOBAL COMMITMENT

PACCOR has signed The New Plastics Economy Global Commitment to eradicate plastic waste and pollution.

CIRCULAR EVENTS

Our initiative that stimulates sustainability awareness and supports event organizers in turning single-use plastic products into valuable resources.

OUR FOOD SERVICE PORTFOLIO

We offer our customers a broad range of standardized and customized cups, pots and containers to meet their diverse needs.

WE PROTECT WHAT IS WORTH PROTECTING

There is no doubt – packaging plays an important role in protecting food and important goods, and greatly contributes to society. This is why design, development and distribution of innovative packaging solutions is our passion.

No matter the size or shape, we always find the best answer to our customers' needs. Not only in terms of protection, but in environmental and economical aspects. Our products and our clients are diverse and require a large portfolio and extensive expertise. In order to serve global companies, as well as regional businesses, we provide several standardized products and develop unique packaging solutions for food, drinks, care products, household cleaning agents, detergents and pharmaceutical products.

Our mission is to protect our customers' goods by providing high quality and state-of-the-art solutions. Over 3000 employees in 16 different manufacturing locations constantly work on finding innovations that allow us to store, transport and protect products around the globe, while ensuring they are aesthetically and ergonomically pleasing for consumers. When it comes to our products, we focus on both form and function.

The lightness and durability of the materials we have developed in recent years make them intrinsically more sustainable than most alternatives. Their function – to preserve and protect food and other goods – enhances shelf life at a lower carbon cost, contributing to the well-being of both people and the planet. By creating a culture of care for materials along the value chain, PACCOR enhances resource efficiency, leading to improved resource usage as well as reductions in emissions, energy and waste.

Nicolas Lorenz, Chief Commercial Officer (CCO)

MARKETS WE SERVE

As the leading international player in the packaging industry, we are dedicated to providing sustainable solutions that enhance the safety, quality and convenience of our customers' goods.

Thanks to our large product portfolio and approach to local partnership, we are a leader in manufacturing and distributing packaging solutions. Our priority is to anticipate customer requirements and to provide value-added solutions. Therefore, we continuously improve and develop our products, working together with respected global brands. Our decades of comprehensive technological expertise enable us to offer our customers a broad range of standardized and customized cups, pots and containers to meet their diverse needs.

Our spreadable cheese, dairy, and oil spread solutions meet current market trends, where consumers seek convenient, sustainable and affordable products in a wide variety of formats. We deliver high-performance solutions with rigid and flexible packaging that add real value to our customers' products by optimizing their protection, nutritional value and shelf-appeal. A passion for the highest quality and efficiency drives us and provides peace of mind for our customers, from concept to market. We ensure consistency and brand integrity across all of our processes, as well as our product formats and substrates, and use state-of-the-art decoration techniques and processes to deliver valuable on-shelf advantages.

Furthermore, we have a wide variety of quality solutions for dairy, ice cream, spoonable or drinkable yogurts, cream and crème fraiche, and sour milks – a high level of protection for all delicate products.

From field to fork, we also serve the needs of the fresh produce industry. Through our commitment to sustainability and to reducing global food waste, our models support the entire packaging journey, beginning with pre-harvest growing solutions all the way through specialty extrusions, scientific shelf-life interventions and award-winning printing across multiple formats. In addition to this, we supply a comprehensive range of packaging for the food service industry such as vending and drinking cups, tumblers, bowls, plates, trays, containers with lids and more. Our range of products also includes trade items, to create a one-stop shipping solution for our customers. To round out our offerings, we also provide packaging solutions for the non-food market. From home care to lawn care to healthcare, we provide an unrivaled breadth of products for some of the most respected brands in the world.

THE NEW PLASTICS ECONOMY GLOBAL COMMITMENT

PACCOR is among the more than 450 organizations that have signed The New Plastics Economy Global Commitment. Signatories include an impressive range of the world's largest packaging producers, brands, retailers and recyclers, as well as governments and NGOs.

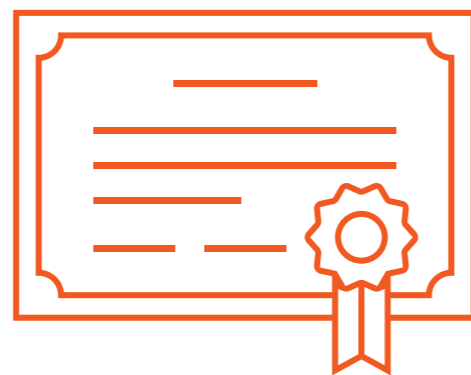

PACCOR has signed The New Plastics Economy Global Commitment to eradicate plastic waste and pollution. It requires that 100% of plastic packaging can easily and safely be reused, recycled or composted by 2025.

We take this commitment seriously on behalf of all our business partners. For us, this translates into:
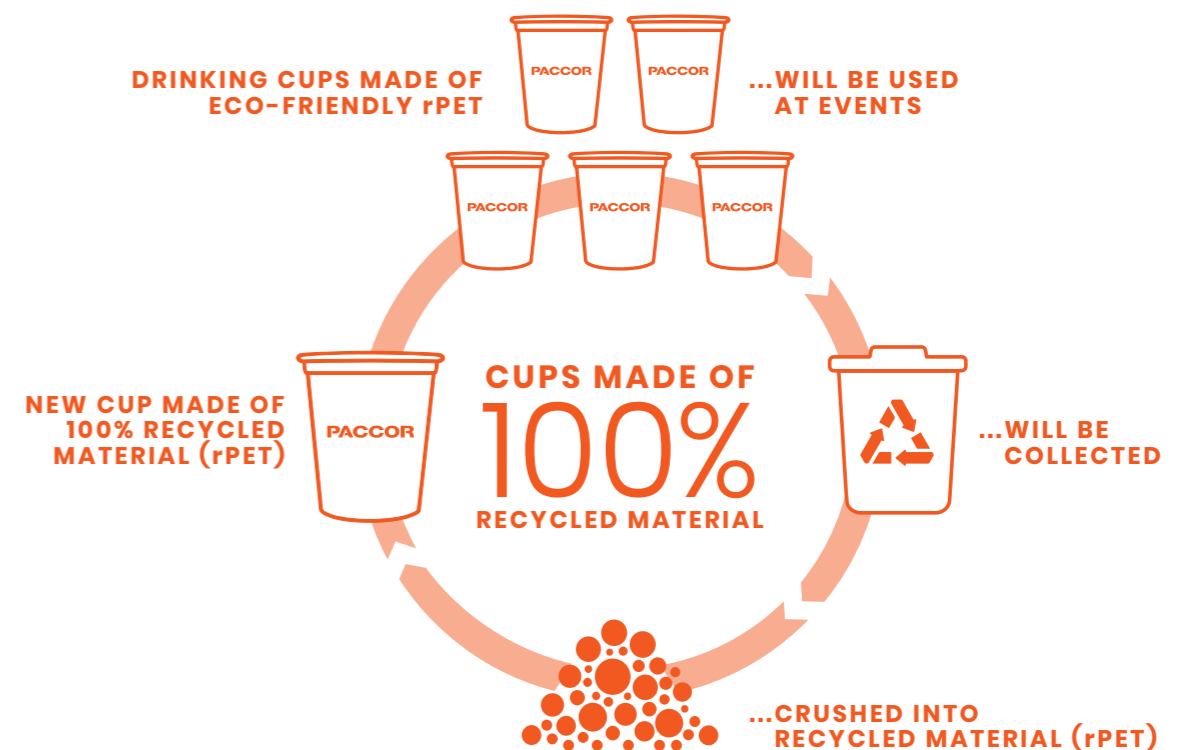

WE ARE A MEMBER OF THE:

- Circular Plastics Alliance (PETcore Europe)
- Elipso (France Plastics Industry Association)
- WRAP (U.K. Plastics Industry Association)
- IK Industrievereinigung (Germany Plastics Association)
- ANAIP (Spanish Plastics Association)

1 Optimizing product design and material use and creating innovative solutions to deliver 100% recyclable products by 2023

2 Increasing the amount of recycled materials made in new products

3 Developing and offering sustainable packaging solutions without compromising food safety, while respecting the health, safety and rights of all people involved

4 Improving constantly our processes

CIRCULAR EVENTS

PACCOR has launched a new project called "Circular Events". An initiative that raises sustainability awareness and supports organizers of events to turn single-use plastic products into valuable resources for future products.

DRINKING CUPS MADE OF ECO-FRIENDLY rPET

...WILL BE USED AT EVENTS

CUPS MADE OF 100% RECYCLED MATERIAL

...WILL BE COLLECTED

NEW CUP MADE OF 100% RECYCLED MATERIAL (rPET)

...CRUSHED INTO RECYCLED MATERIAL (rPET)

The whole process is composed of the following steps: beverage and food plastic containers used during big assemblies, such as music concerts or sport performances, are collected and transported to specialized recycling partners, then crushed and recycled to avoid ending up in landfills or being incinerated. Afterward, the material will be used in PACCOR's manufacturing sites to produce new cups made of 100% recycled material (rPET), closing the loop of our drinking cups.

PACCOR TO START MARKING SINGLE-USE BEVERAGE CUPS

According to the Single-Use Plastics Directive (SUP), specifically Regulation (EU) 2020/2151 of 17 December 2020 laying down rules on harmonised marking specifications on single-use plastic products listed in Part D of the Annex to Directive (EU) 2019/904 of the European Parliament and of the Council, all disposable beverage cups made wholly or partly from plastic need to be provided with EU prescribed logo. The Regulation comes into force for products, which are first placed on the Member State market after 3rd July 2021.

MADE OF PLASTIC

TECHNICAL BACKGROUND

- The logo will be applied by embossing and the information text of the marking will be written in the official language where the single-use plastic product is placed on the market.
- Optimization embossing visibility – the shape of the cups has been modified to improve embossment visibility.

SUSTAINABILITY

Embossing is sustainable solution as it allows to implement EU marking without usage of ink and does not require an extra step in production process.

VALUE PROPOSITION

- Your products comply with the EU's requirements
- Aligned with PACCOR's CARE strategy on sustainability
- Complete range of drinking cups from 0.2 l to 0.5 l, with 75 & 95 mm diameter.

INFORMATION

Standard cup models will still be available in PACCOR portfolio but without EU embossing. Of course, there is possibility to apply EU marking by color or laser, with extra print cost applied. These cups will be governed no longer by MTS (made to stock) rules but switch automatically to MTO (made to order) rules, thus require agreed production MOQ and delivery times.
