YOUR PARTNER FOR PROTECTION

We create innovative packaging solutions with the overall goal of protecting our partners, their products and our planet.

CO-DEVELOPMENT PROCESS

From idea generation to product delivery - we offer our customers comprehensive advice.

OUR TECHNOLOGICAL EXPERTISE

Thanks to our great expertise in manufacturing processes and decoration, we can cover every need of our customers.

OUR PORTFOLIO EXAMPLES

For our customers' dairy products we offer a wide range of flexible, individual solutions for cups, containers and pots.

PACCOR

OUR PARTNERSHIP STATEMENT

YOUR PARTNER FOR PROTECTION

We at PACCOR create long-lasting and innovative packaging solutions with the overall goal of protecting what is worth being protected: our partners, their products and the planet. So when speaking about "protection" we always make sure to consider all of the above. Because for us, protection is not only about minimizing food waste, it is also about taking care of future resources and our customers economic efficiency.

LIVING AND VALUING PARTNERSHIPS

We build solid relationships and partnerships with our customers, because commitment and stability are key to sustainable development in the value chain. We build alliances with business partners and third-party organisations to create shared value for all our stakeholders: Conserving resources, protecting nature, improving the quality of life of communities, protecting food and goods for a wider population, engaging our employees and generating returns that encourage investors to support our plans for the future. We combine our geographical footprint, know-how and expertise with the creativity of our strategic partners and scale it up to deliver offers which make a positive impact in terms of driving the transition towards a circular economy.

CONSULTING WITH DIALOGUE, TRUST AND UNDERSTANDING

Although we have a huge packaging portfolio, certain needs and demands require individual solutions in order to provide the best possible protection for our customers' products. Therefore, we advise our customers holistically from idea to finished product. It is very important to us that an open and honest dialogue is established in the process and that this forms the basis for trusting partnerships with our customers.

ACTING WITH ENVIRONMENTAL, ECONOMIC AND SOCIAL RESPONSIBILITY

The PACCOR sustainability strategy aims to create value for all of our stakeholders in both the short and long term. We are part of the solution and set the sustainability agenda for our sector. PACCOR is actively partnering with suppliers, customers, consumers, NGOs and universities as the sustainable basis of our daily business. We build relationships that lead to circular products, services and production while constantly striving for better quality and product safety within a responsible supply chain. It is in our DNA to make sure to be the best partner to work with – whether by ensuring high quality products, providing the best customer service or by facing environmental challenges.

DEVELOPING CUSTOMISED SOLUTIONS BASED ON EXPERTISE AND PASSION

We at PACCOR have a large product portfolio with many packaging solutions for different markets: dairy, spreads, convenience food, produce, food service and non-food. Our priority is to anticipate our customers' requirements and to provide value-added solutions. Therefore, we continuously improve and develop our products, working together with respected global brands.

CO-DEVELOPMENT PROCESS

1

IDEA GENERATION

- Deliberation
- Trend research & analysis
- Customer briefing
- Face-to-face meeting
- Definition of project scope, requirements and commercials

2

DESIGN VISUALISATION

- Product sketches
- Concept presentations
- 3D product designs
- Packaging animations
- Virtual shop visualisation

3

TECHNICAL DESIGN

- Production-ready 2D drawings
- For products and tools
- Exact dimensions
- Directly linked with a 3D model
- For accelerated design processing

4

RAPID PROTOTYPING

- 3D printed mock-ups for visual presentations
- Coloured or white
- Branded or non-branded
- Customised designs possible
- Including touch and feel elements

5

TOOLING & SAMPLING

- CAD drawings translated into CNC programs
- Test inserts or pilot tools for product samples
- Feasibility & quality tests (top load, stack compression, etc.)
- Customer approval
- Serial inserts for production

6

PACKAGING SUPPLY

- Industrialisation
- Validation
- Auditing
- Launch
- Customer Service

ALLOWING YOU TO BE FAST, INDIVIDUAL & OUTSTANDING

1

Wide choice & endless combination of various packaging types, shapes, raw materials, technologies and decoration options

2

High-quality packaging designs, concept presentations, prototypes, test inserts & tools and samples

3

Custom-made and confidential development with fast time-to-market

COMPRESSION MOULDING

DECORATION

- Induction heat sealing
- Embossing

MATERIAL

- HDPE

OUR COMPREHENSIVE TECHNOLOGY EXPERTISE

Thanks to our different production methods and technologies, we can create plastic packaging that is specially adapted to the individual needs and characteristics of our customers' products.

1 EXTRUSION

We have great expertise in the extrusion of plastic sheets. This process extrudes all mono- and multi-layer structures for thermoforming as well as complex films for the barrier film market and form-fill-seal applications.

2 THERMOFORMING

Thermoforming is our main process. Thanks to our efficient production processes, we produce consistently high quality and reliable output. Our extensive capacity in high-speed thermoforming enables us to meet our customers' requirements and offer a wide range of standard and customised packaging solutions. For products with longer shelf life we use the revolutionary TIML technology. This offers the very first decorated, high barrier and sterilizable solution for plastic packaging.

3 INJECTION MOULDING

Our offer of rigid plastic packaging solutions is completed by injection moulding of in-mould labelling and complex shapes with tamper-proof lids. Sharp and

eye-catching images make the packaging stand out on the shelf and catch the eye. Our thin-wall technology also ensures the lowest possible weight.

4 COMPRESSION MOULDING

Our compression technology enables us to produce induction heat seals, EPE liners and caps with high efficiency, flexibility and speed.

EXAMPLES OF
OUR DAIRY PORTFOLIO

PACCOR

THE PERFECT COMBINATION OF PAPER AND PLASTIC

Varied shapes and sizes of containers to store different products:

available in standard & light versions

easy separation

available in light version

customizable

numerous decoration options

sustainable

FEATURES AND BENEFITS:

- offer a high standard in food safety and product presentation
- perfect choice to protect the nutritional value, colour, aroma and taste of food products
- various material options for insert and paper segment
- hot filling and microwaving are also options
- zipper for easy separation of paper and plastic

high quality printing

contains up to 50% less plastic

PROTECTING YOUR PRODUCTS

with expertise in dairy packaging

FOR MULTIPLE USAGE IN ALL FOOD & PACKAGING SECTORS

DAIRY PRODUCTS

CONVENIENCE FOOD

FOOD SERVICE

INSTANT FOOD

CEREALS

PET FOOD

STANDARD VERSION

- total paper look
- soft-touch varnish gives the printed surface a velvety soft and pleasant feel
- zipper (paper perforation) to easily separate the paper segment from the cup
- with see-through window cutout option
- increased height of the packaging improves shelf presentation

LIGHT VERSION

- cost-efficient solution without paper bottom
- variety of differentiation and communication options
- available also without glue for even easier separation of paper and plastic

FFS ROLLSTOCK FOR THE DAIRY INDUSTRY

numerous decoration options

natural, white or bicoloured

Varied shapes and sizes of containers to store different products:

FEATURES AND BENEFITS:

- numerous decoration options
- outstanding gas barrier properties
- good processability
- aseptic, sterilisation, pasteurisation
- better, longer shelf life
- smooth haptic
- better stress cracking durability

structure on request

ecological & resource-saving solution

THERMOFORMING

OFFSET PRINTING & IN-MOULD LABELING (T-IML)

transformable into endless shapes and sizes

great presentation

FEATURES AND BENEFITS:

- dry offset printing in DLE technology - Direct Laser Engraving: sharper and brighter print results
- revolutionary T-IML technology: IML decorated, barrier and resortable plastic packaging solutions for products with a longer shelf life
- modular insert technology with lower tooling costs
- high standards of food safety labelling and product presentation

Varied shapes and sizes of containers to store different products:

high quality printing

numerous decoration options

INJECTED DAIRY PACKAGING

top quality printing

IML overcapping lid

Varied shapes and sizes of containers to store different products:

great stackability

up to 15% weight reduction & material saving

FEATURES AND BENEFITS:

- highest decoration possibilities and shelf impact, freedom of form and function
- eco-friendly technology by energy saving through the production process
- compression technology: less material usage and longer tooling life
- compact and simple shapes generate great stackability and maximise the shelf space

PACCOR

PACCOR
A PART OF FAERCH

CONTINUOUS COMPRESSION MOULDING

CAPS & TOP CLOSURES

spirals provide side impact strength

different design alternatives

customer exclusivity

improved performance

FEATURES AND BENEFITS:

- enables up to 30% weight reduction through a decreased wall thickness
- higher accuracy and lower tolerance levels in the production process resulting in improved performance on customers' filling lines
- available in a variety of formats including tamper-evident, induction heat seals, single-piece bore seals and EPE lined
- different alternatives such as embossing, debossing, surface finish variation can be a very cost-effective means of offering brand identity

reduction of materials up to 30%

reduction of carbon footprint up to 40%
