MARKETS WE SERVE

Our diverse solutions meet current market trends, where consumers seek convenient, sustainable and affordable products in a wide variety of formats.

THE NEW PLASTICS ECONOMY GLOBAL COMMITMENT

PACCOR has signed The New Plastics Economy Global Commitment to eradicate plastic waste and pollution.

CIRCULAR EVENTS

Our initiative that stimulates sustainability awareness and supports event organizers in turning single-use plastic products into valuable resources.

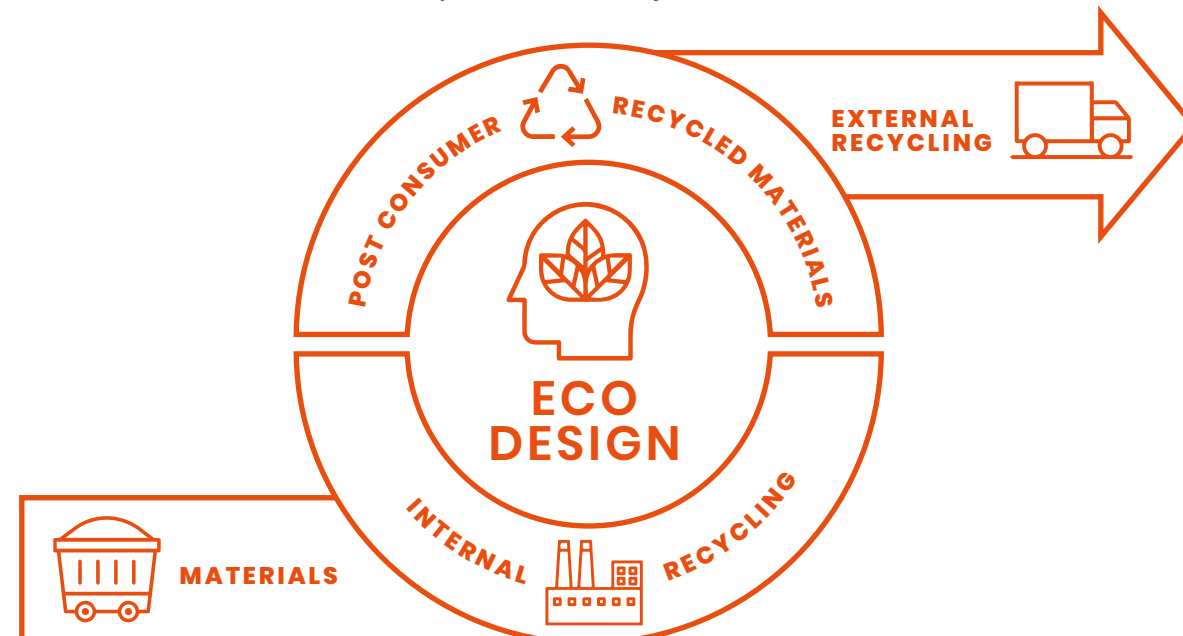

OUR FOOD SERVICE PORTFOLIO

We offer our customers a broad range of standardized and customized cups, pots and containers to meet their diverse needs.

THE NEW PLASTICS ECONOMY GLOBAL COMMITMENT

PACCOR is among the more than 450 organizations that have signed The New Plastics Economy Global Commitment. Signatories include an impressive range of the world's largest packaging producers, brands, retailers and recyclers, as well as governments and NGOs.

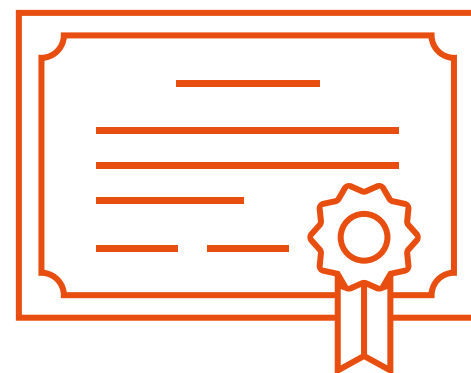

PACCOR has signed The New Plastics Economy Global Commitment to eradicate plastic waste and pollution. It requires that 100% of plastic packaging can easily and safely be reused, recycled or composted by 2025.

We take this commitment seriously on behalf of all our business partners. For us, this translates into:

WE ARE A MEMBER OF THE:

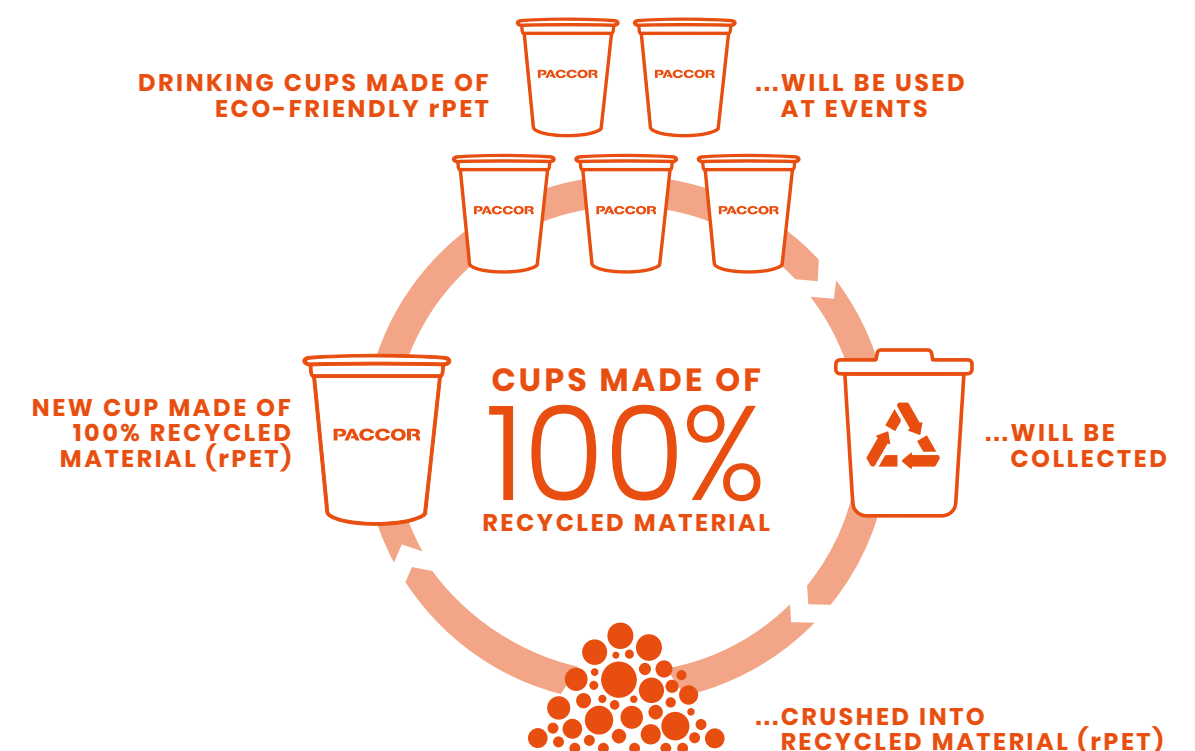

- Circular Plastics Alliance (PETcore Europe)
- Elipso (France Plastics Industry Association)
- WRAP (U.K. Plastics Industry Association)
- IK Industrievereinigung (Germany Plastics Association)
- ANAIP (Spanish Plastics Association)

- 1 Optimizing product design and material use and creating innovative solutions to deliver 100% recyclable products by 2023
- 2 Increasing the amount of recycled materials made in new products
- 3 Developing and offering sustainable packaging solutions without compromising food safety, while respecting the health, safety and rights of all people involved
- 4 Improving constantly our processes

CIRCULAR EVENTS

PACCOR has launched a new project called "Circular Events". An initiative that raises sustainability awareness and supports organizers of events to turn single-use plastic products into valuable resources for future products.

The whole process is composed of the following steps: beverage and food plastic containers used during big assemblies, such as music concerts or sport performances, are collected and transported to specialized recycling partners, then crushed and

recycled to avoid ending up in landfills or being incinerated. Afterward, the material will be used in PACCOR's manufacturing sites to produce new cups made of 100% recycled material (rPET), closing the loop of our drinking cups.

PACCOR TO START MARKING SINGLE-USE BEVERAGE CUPS

According to the Single-Use Plastics Directive (SUP), specifically Regulation (EU) 2020/2151 of 17 December 2020 laying down rules on harmonised marking specifications on single-use plastic products listed in Part D of the Annex to Directive (EU) 2019/904 of the European Parliament and of the Council, all disposable beverage cups made wholly or partly from plastic need to be provided with EU prescribed logo. The Regulation comes into force for products, which are first placed on the Member State market after 3rd July 2021.

TECHNICAL BACKGROUND

- The logo will be applied by embossing and the information text of the marking will be written in the official language where the single-use plastic product is placed on the market.
- Optimization embossing visibility – the shape of the cups has been modified to improve embossment visibility.

SUSTAINABILITY

Embossing is sustainable solution as it allows to implement EU marking without usage of ink and does not require an extra step in production process.

VALUE PROPOSITION

- Your products comply with the EU's requirements
- Aligned with PACCOR's CARE strategy on sustainability
- Complete range of drinking cups from 0.2 l to 0.5 l, with 75 & 95 mm diameter.

INFORMATION

Standard cup models will still be available in PACCOR portfolio but without EU embossing. Of course, there is possibility to apply EU marking by color or laser, with extra print cost applied. These cups will be governed no longer by MTS (made to stock) rules but switch automatically to MTO (made to order) rules, thus require agreed production MOQ and delivery times.
