MARKETS WE SERVE

Our diverse solutions meet current market trends, where consumers seek convenient, sustainable and affordable products in a wide variety of formats.

THE NEW PLASTIC **ECONOMY GLOBAL** COMMITMENT

PACCOR has signed The New Plastic Economy Global Commitment to eradicate plastic waste and pollution.

CIRCULAR EVENTS

Our initiative which stimulates sustainability awareness and supports event organisers to turn single-use plastic products into valuable resources.

OUR FOOD SERVICE PORTFOLIO

We offer our customers a broad range of standardised and customised cups, pots and containers to meet their diverse needs.

WE PROTECT WHAT IS WORTH PROTECTING

There is no doubt: packaging has an important role to play in protecting food and other important goods and makes a huge contribution to our society. This is the reason why designing, developing and distributing innovative packaging solutions is our passion.

No matter what size or shape - we always find the best way to fit our customers' purposes. Not only in terms of protection, but also regarding environmental and economical aspects. Both our products and our clients are very diverse and therefore require a large portfolio and extensive expertise. In order to serve global companies as well as regional businesses, we provide several standardised products, but we also develop individual packaging solutions for food, drinks, care products, household cleaning agents, detergents and pharmaceutical products.

Our mission is to protect our customers' goods by providing high quality and stateof-the-art solutions. Over 3000 employees in 16 different manufacturing locations are constantly working on finding innovations that allow us to store, transport and protect products around the globe, while making sure they are aesthetically and ergonomically pleasing for consumers. Because when it comes to our products, we like to focus on both: form and function.

The lightness and durability of the materials we have been developing in past years make them intrinsically more sustainable than most alternatives. Their function - to preserve and protect food and other goods - enhances shelf life at a lower carbon cost, contributing to the well-being of both people and the planet. By creating a culture of care for materials along the value chain, PACCOR enhances resource efficiency, leading to improved resource usage as well as reductions in emissions, energy and waste.

Nicolas Lorenz, Chief Commercial Officer (CCO)

MARKETS WE SERVE

From packaging for dairy to solutions for non-food products:
As a leading international manufacturing company, we are
dedicated to providing sustainable solutions that enhance the safety,
quality and convenience of our customers' goods.

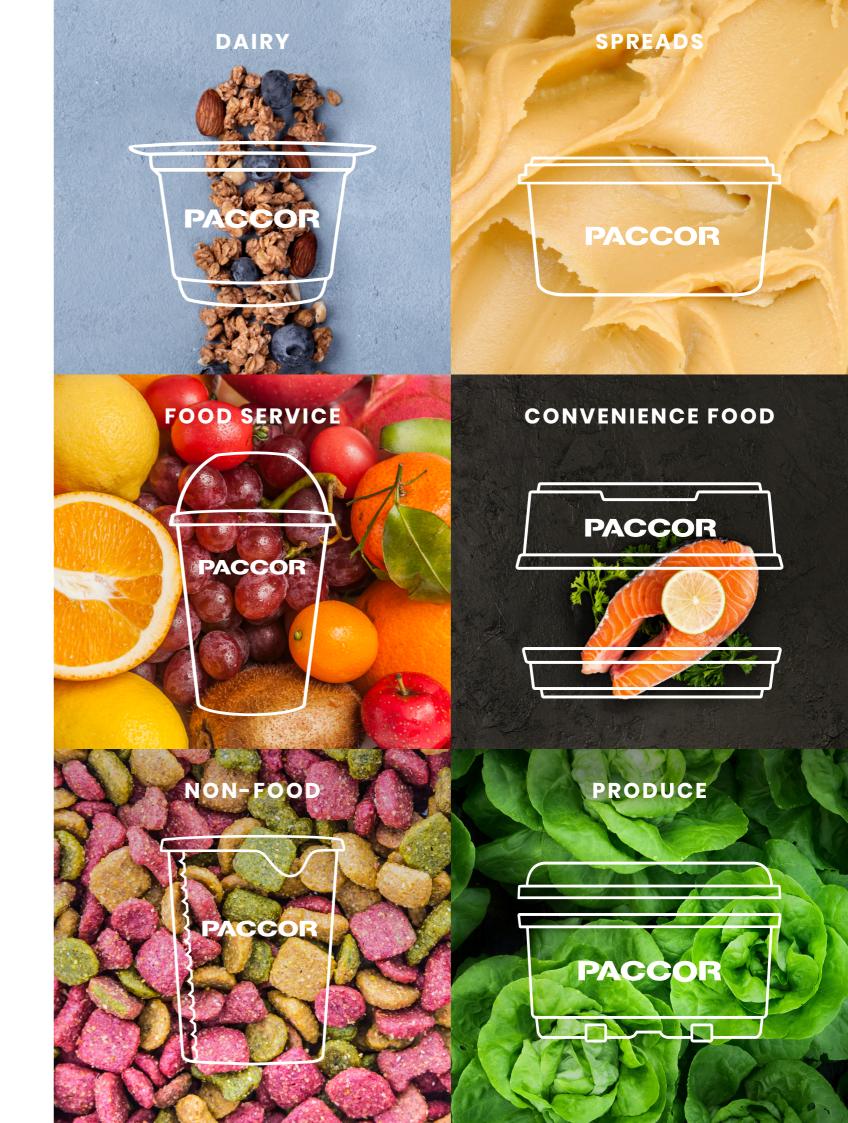

Thanks to our large product portfolio and our approach of local partnership, we are a leader in manufacturing and distributing packaging solutions. Our priority is to anticipate our customers' requirements and to provide value-added solutions. Therefore, we continuously improve and develop our products, working together with respected global brands. Our decades of comprehensive technological expertise enable us to offer our customers a broad range of standardised and customised cups, pots and containers to meet their diverse needs.

Whether spreadable cheese or dairy and oil spreads: our solutions meet current market trends, where consumers seek convenient, sustainable and affordable products in a wide variety of formats. We deliver high-performance solutions with rigid and flexible packaging that add real value to our customer' products by optimizing their protection, nutritional value and shelf-appeal. A passion for the highest quality and efficiency drives us and provides peace of mind for our customers, from concept to market. We ensure unrivalled consistency and brand integrity across all of our processes, as well as our product formats and substrates, and use state of-theart decoration techniques and processes to deliver unrivalled on-shelf advantages.

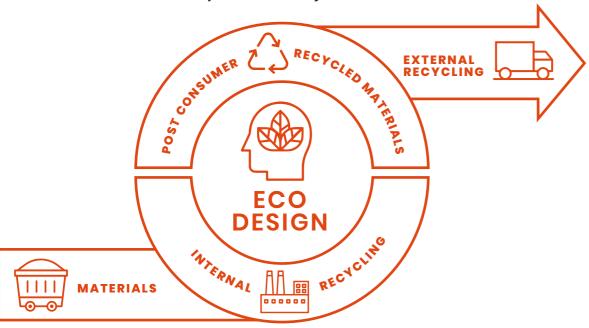

Furthermore, we offer high-quality solutions for products such as dairy and ice cream. No matter if our customers are in need of safe packaging solutions for spoonable or drinking yoghurts, cream and crème fraiche or sour milk drinks – we have a wide variety of solutions that fulfill all the criteria of protecting these delicate goods.

We also serve the needs of the fresh produce industry, from field to fork. Through our commitment to sustainability and to reducing global food waste, our models support the entire packaging journey, beginning with pre-harvesting growing solutions all the way through to specialty extrusions, scientific shelf-life interventions and award-winning printing across multiple formats. In addition to this, we supply a comprehensive range of packaging for the food service industry such as vending and drinking cups, tumblers, bowls, plates, trays, containers with lids and more. Our range of products also includes trade items, to create a one-stop shipping solution for our customers. To round out our offerings, we also provide packaging solutions for the non-food market. From home care to lawn care to healthcare, we provide an unrivalled breadth of products for some of the most respected brands in the world.

THE NEW PLASTIC ECONOMY GLOBAL COMMITMENT

PACCOR is among the more than 450 organisations that have signed The New Plastics Economy Global Commitment. Signatories include an impressive range of the world's largest packaging producers, brands, retailers and recyclers, as well as governments and NGOs.

PACCOR has signed The New Plastic Economy Global Commitment to eradicate plastic waste and pollution. It requires that 100% of plastic packaging can easily and safely be reused, recycled or composted by 2025.

We take this commitment very seriously on behalf of all our business partners. For us, this translates into:

Optimizing product design and material use and creating innovative solutions to deliver 100% recyclable products by 2023

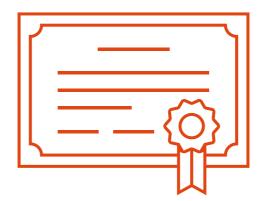

Increasing the amount of recycled materials made in new products

Developing and offering sustainable packaging solutions without compromising food safety, while respecting the health, safety and rights of all people involved

Improving constantly our processes

WE ARE A MEMBER OF THE:

- Circular Plastic Alliance (PETcore Europe)
- Elipso (France Plastics Industry Association)
- WRAP (U.K. Plastics Industry Association)
- IK Industrievereinigung (Germany Plastic Association)
- ANAIP (Spain Plastic Association)

CIRCULAR EVENTS

PACCOR has launched a new project called "Circular Events". An initiative which stimulates sustainability awareness and supports organisers of events to turn single-use plastic products into valuable resources for future products.

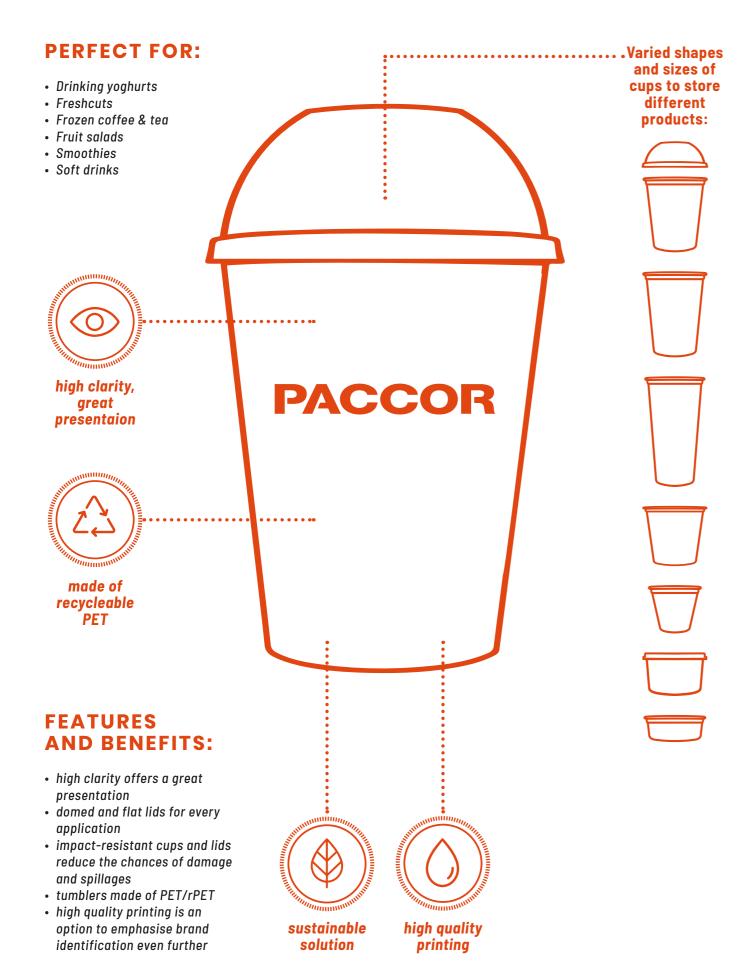

The whole process is composed of the following steps: beverage and food plastic containers used during big assemblies, such as music concerts, shows or sport performances are collected and transported to specialised recycling partners, then crushed and

recycled to avoid ending up in landfills or being incinerated. Afterwards, the material will be used in PACCOR's manufacturing sites to produce new cups made of 100% recycled material (rPET), closing the loop of our drinking cups.
