AND THE OSCAR GOES TO... DELITWIST BY PACCOR

DeliTwist, an innovative thermoformed screw top pot made of rPET, has been awarded the prestigious distinction "Oscar de l'Emballage". The award, so-called the Oscar of the packaging business, was handed over in front of more than 200 distinguished guests representing different sectors of the industry.

Gathered in the Élysées Biarritz cinema at the legendary Champs-Élysées in Paris, France, more than 200 invitees came to discover the winners of the 2019 edition of the "Packaging Oscars". Supported by a Group of French process and packaging equipment manufacturers (Geppia), MGI Digital Technology, Posson and Tapi, and with the participation of the All4pack fair, this year's ceremony awarded nominees in five categories: Consumption, Transformation, Production, Environment, and Promising beginnings.

In the first category "Consumption", in terms of functionality, PACCOR has been announced the winner with their DeliTwist – a thermoformed screw top pot made of rPET. These innovative pots offer a cost-efficient, convenient and sustainable solution for all products that require being packed in pots with leak resistant closure. The ingenious DeliTwist features a patented twist lid closure which makes them the ideal companion for on-the-go consumption. Its smooth opening and closing avoids spilling its content, and its tightness allows it to keep food for later without fearing that any substance could drip into one's bag. The DeliTwist can be used for a wide variety of food and non-food products, and is ideal for deli products, prepared salads, and fruit, accompaniments, dressings, confectionery, etc.

Designed with customer functionality in mind, they have also integrated environment consciousness as they can be reused to store food at home, carry lunch or buy products (even liquids) in bulk. The DeliTwist is thermoformed from rPET containing up to 100% of post-consumer waste recovered from general collection schemes. Thanks to PACCOR's post-consumer PET decontamination technology and the use of a mono-material, both for the lid and container, which is fully recycled to produce new pots, the manufacturer further backs sustainability.

DeliTwist pots comply with PACCOR's vision for a new generation of packaging solutions: safe – with a tamper and tight closure, easy to handle – with a smooth opening that avoids spilling food, reclosable – to avoid food waste, reusable – to extend the lifecycle of the pot, recyclable and made of recycled PET to save natural resources.

ABOUT PACCOR

At PACCOR we create innovative and sustainable packaging solutions for the consumer, food and foodservice market. Our overall goal is to protect what is worth being protected: our planet, our partners' products and our employees. We have high expertise in developing and providing valuable rigid plastic packaging products. Our solutions meet current market trends by constantly thinking outside the box. With more than 3,000 dedicated employees in 15 countries, PACCOR is a global player in the packaging industry. Everything we do contributes to the protection and hygienic safety of valuable products. PACCOR leads the transition towards a circular economy. Because we believe this is the best way to achieve real change in the industry and to create shared value for all our stakeholders and society.
